

HEAD RACE RESULTS

On the day, preliminary information on times taken will become available at:

<https://www.webscorer.com/acrc>

The data there will be subject to change and there will be no Masters Handicaps data.

It is hoped to be able to provide information for each crew shortly after the crew has crossed the Finish line but this will depend on the availability of internet upload capability at the timing points. The data may be delayed until the end of the Division.

The data may be easier to read using the Webscorer FAN app, which can be downloaded free of charge (find the race by selecting "Recent Results" with the filter set to "Rowing").

The Webscorer data for the Long Course will also be displayed on a screen visible at the river end of the Facilities block (under the balcony).

After each pair of Long/Short Divisions, print-outs of the results will be posted at Registration. The information there will be more final than the Webscorer data. When winners are known, this will be indicated on those sheets and the medals may be collected from Registration.

Information on the winners of "Fastest Masters Boat after handicap" will not become available until after the end of the last Division.

The aim is to upload the finalised results to the ACRC website on the evening of the race:
